## **DETAILED ACTION**

### ***Request for Continued Examination***

1. The request filed on April 10, 2006 for a Request for Continued Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 10/621,727 is acceptable and a RCE has been established. An action on the RCE follows. Claims 1-4, 6, 11-14, 16-25 are pending.
2. In view of argument filed March 7, 2006, the rejection of claims 1-4, 6, 17, 19-21, 22-24 are rejected under 35 U.S.C. 112, first paragraph, is withdrawn. Further, the rejection of Claims 19-21 under 35 U.S.C. 112, second paragraph, is withdrawn.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1713

4. Claims 1-4, 6, 11-14, 16-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Booth (US 2,059,930) for the reasons adequately set forth from paragraph 7 of the office action of November 10, 2005.

Applicant's arguments filed March 7, 2006 have been fully considered but they are not persuasive.

Applicants argue that the amended feature "with an unsaturation" of claim 1 is adequate to overcome the rejection of Booth. However, the examiner disagrees because Booth (col. 1, line 17) discloses "olive oil" as an oil ingredient for the disclosed composition.

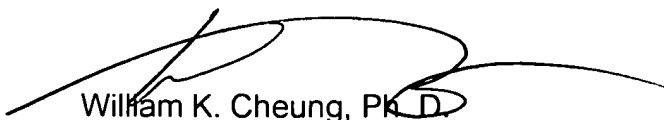

Regarding applicants' argument that Booth is silent on the dielectric properties of claim 11 as claimed, applicants fail to recognize that the claimed dielectric properties are inherent properties of the oil disclosed in Booth. In view of the substantially identical composition disclosed in Booth and the composition as claimed, the examiner has a reasonable basis that the claimed dielectric properties are inherently possessed in Booth. Since the PTO does not have proper means to conduct experiments, the burden of proof is now shifted to applicants to show otherwise. In re Best, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977); In re Fitzgerald, 205 USPQ 594 (CCPA 1980).
